

SKODA

Kamiq

When you know what fits you

once you've come to the point in life where you know what you want, you might want this car. With its compact dimensions paired with a bold design language, the Škoda Kamiq combines understatement with a lot of self-confidence. A perfect car that fits all your needs in the city – and into most parking spaces.

The Kamiq also offers abundant technologies uncommon for the compact city crossover. Advanced assistance systems and a new generation of infotainment mean you can stay safe without compromising on fun, on every journey.

Exterior Design

Design that leads, not follows

He's got the look: the Kamiq is the perfect mix of robustness and dynamic shapes defined by the Škoda design language. It is the first Škoda crossover.

Style and functionality

With its exterior the Kamiq manifests belonging to the Škoda family, but at the same time shows its individuality. The car offers SUV features, such as a higher chassis and rugged appearance, combined with the practicality of a compact city car.

Front view

The Kamiq features the wide front grille and split headlights, which give the front a unique appearance. The add-on part on the front bumper in platinum grey or black emphasises the car's crossover character.

Panoramic roof

To add a more individual signature to daily driving, the Kamiq can be equipped with the optional black panoramic roof.

Rear view

With the unmistakable Škoda inscription in the back the car proudly declares its family allegiance. The add-on part on the rear bumper with integrated diffuser in platinum grey or black, accentuating the generous clearance, gives the car rear an exceptionally robust appearance.

Trend-proof beauty

Light doesn't just illuminate. It inspires. The unique headlights and slim long tail lights make the car instantly recognisable, representing a perfect blend of Czech crystal tradition and modern technology.

Bi-LED headlights

The top-end option is all about LED technology including corner function and fog lights. The daytime running lights in the upper part of the two-piece headlights combines innovative technology with an unmistakable look.

Full LED tail lights

The Kamiq features horizontally designed tail lights where the original light signature is accompanied by perfect functionality. The top-end option comes with the full LED tail lights, which are fitted with animated turn indicators.

Interior Design

Style and functionality

The Kamiq's interior is furnished with quality materials and great craftsmanship. Multiple combinations of upholstery and décor mean you can give your car a unique personality. Thanks to the beautifully shaped and comfortable seats, you will feel fresh even after a long drive. In the roof panel, you can find an additional USB-C slot which is ideal for charging devices mounted on the windscreen.

Your personal place to be

Virtual Cockpit

The Virtual Cockpit displays on-board computer specifications in combination with other information such as navigation, for example. You can choose from five layouts (extended view shown) controlled via the 'View' button on the steering wheel. The Kamiq's Virtual Cockpit features a 10.25" display.

Inside the Kamiq you will feel right at home. The interior, which matches the design of the exterior with its self-confidence and total functionality, offers exceptional spaciousness, quality materials including attractive décor and cutting-edge digital technology.

Ambient lighting

Make your space more cosy and comfortable with LED ambient lights running along the dashboard. Your car can be equipped with white, red or copper lighting.

Connectivity

Calendar

With the Calendar app, designed for work-related activities, you can spend your travel time productively and safely. The application allows you to conveniently access and interact with your calendar while driving. Using the navigation button, the Calendar app will navigate you to your planned meetings. You can also join conference calls using a connected mobile phone. All of the content is synchronised online and linked to your account for seamless transition between your devices.

Škoda connect: Take the online world with you

Stay connected wherever you are. Being fully and permanently online means always having access to entertainment, information, and possible assistance while on the move. Škoda Connect is your gateway to a world of unlimited communication options.

Parking position

The vehicle sends its location data to the backend server once the journey is completed. You can then find the position of your parked vehicle using the MyŠKODA app.

Online Traffic Information

With Online Traffic Information, you always get up-to-date information, saving you time and the stress of sitting in traffic jams. If enabled, the navigation system will automatically recalculate the route to arrive at the destination just in time.

Additional connectivity options

Discover additional options and features. For example, with Laura, a digital voice assistant is available in your car. With the SmartLink feature, supporting Apple CarPlay and Android Auto, the car's infotainment system allows you to use your phone safely while driving. You can also enhance the in-car connectivity with additional Infotainment apps such as Weather, News, Digital manual, Traffication, and many more.

Laura digital voice assistant

This online-based voice control system understands fluent sentences. Say the destination with natural voice input, dictate text messages, or even ask her to tell you a joke. The online part of Laura is ready for anything. To start fulfilling your wishes, simply contact her by saying "Okay, Laura!"

Traffication

The Traffication app increases your safety by providing traffic-related warnings from the vicinity of the vehicle. Running in the background, it alerts you if you are attempting to drive the wrong way down a road. Notifications are also shown in the event that hazard lights are activated in the radius of your vehicle.

Simply
Clever

Electrically-controlled 5th door

It opens and closes at the mere touch of a button on the remote control or in the driver's door, especially handy in unfavourable weather. You can also adjust the upper door position to suit your needs. A button for closing the 5th door is also located on the door itself.

From big ideas to the smallest details

Think big. Every detail in your car has been designed to make your travelling hassle-free. From loading your luggage, adjusting the interior space and finding room for your belongings.

Towing device

The Kamiq has a foldable towing device with electric release. The switch is in the luggage compartment.

Door edge protection

When opening all side doors, plastic strips eject and cover the edges. In this way, the Kamiq protects itself against damage as well as being considerate to other cars. Perfect for tight parking spaces, for instance.

Double floor

The double floor places the bottom of the luggage compartment on the loading edge level, facilitating easier luggage handling. In addition, it provides a discrete storage place.

Liquid reservoir

You will never spill a single drop when refilling the washer fluid. The liquid reservoir is not only easily accessible, but also has an integrated funnel.

Umbrella storage compartment

An ingenious compartment with original Škoda umbrella is fitted inside the driver's door. It is designed to let water drain away from the car, keeping the interior dry.

Luggage Compartment

Packed with creativity

Even the Kamiq's luggage compartment represents what creative design means. The boot is fitted with features ensuring your stuff stays in its place and your car stays clean. What's more: the generous capacity of 400 litres, and 1,395 litres after folding down the rear seats, puts this car at the top of its class.

Net programme

One horizontal and two vertical nets increase the flexibility of the luggage space while firmly securing objects.

Double-sided carpet

You can use the carpet with the elegant fabric side up when not transporting anything that might make your car dirty and can easily turn it over to utilise the washable rubber side when required.

Comfort

Online personalisation

You will appreciate this service especially if your car is driven by multiple users. Set Individual driving profile, digital dashboard layout, or air conditioning parameters – the settings will be synchronised with your Škoda ID account. So, the next time you log into your car after it has been driven by someone else, you can comfortably set off with your preferred settings enabled. With online personalisation, you can set your preferred settings not only in your car, but in any Škoda vehicle that supports this.

Amundsen 9.2" Infotainment

Attractive design is accompanied by perfect functionality. In addition to the touch or gesture control, you can operate the device via Laura, the digital assistant. This new enhanced and online-based voice control system can answer queries about a wide variety of topics and follows commands. For example, it will start navigation to a desired destination, find a favourite piece of music or take dictation for an SMS. The Web radio feature also comes as a bundle in combination with the Amundsen infotainment system. It allows you to

expand the usual portfolio of conventional stations with your other favourite channels, podcasts, and news. You can tune in and listen in high quality to any radio streaming service in an area covered by the Internet. Combined with the Virtual Cockpit, the Amundsen infotainment system also offers the Traffic Sign Recognition function.

Inner Confidence

Heating functions

The heating function of the front windscreen, which quickly clears frost or steam, and heating of the multifunctional steering wheel are controlled via the infotainment system.

Loaded with thoughtful features and sophisticated assistant systems, the car will indulge you in absolute comfort and support your driving confidence. Whatever comfort means to you, you will find it inside the Kamiq.

Phone box / USB

The Kamiq comes with an enlarged phone box which creates an amplified signal for your mobile device and, at the same time, wirelessly charges your phone while driving. This compartment is not only easily accessible but is also suitable for large display devices. Two USB-C ports located in a centre console allow you to easily connect your external devices without the need for dongles or adapters.

Retractable mirrors

The automatically retractable external side-view mirrors fold in when the car is locked, thus protecting them against damage.

KESY

The car equipped with KESY (Keyless Entry, Start and exit System) or with the simpler version Easy Start features a Start/Stop button on the steering column.

Electrically-adjustable driver seat

For the best feeling behind the steering wheel, we offer you the electrically adjustable driver seat.

Škoda Sound System

Enjoy absolute sound clarity, whether it's music or the spoken word, on the Sound System. The system features ten speakers, including a central speaker in the dashboard and subwoofer in the luggage compartment. Among other features the sound can be adjusted according to how many people are in the car and where they are sitting via the All, Front and Driver profiles. The device offers a total power output of 405 watts.

Heated seats / USB

In cold weather, your friends and family will appreciate the heated rear seats, which are regulated by a separate control on the rear side of the front armrest. Two USB-C slots enable universal mobile phone charging.

Safety

Adaptive Cruise Control

Using a radar device in the front grille, in addition to its basic cruise control function, Adaptive Cruise Control (not shown) maintains a safe distance from vehicles in front of you. This system operates up to speeds of 210 km/h. Depending on various factors, Predictive Adaptive Cruise Control (shown) is also available. For more information, contact your Škoda partner.

Travel Assist

Travel Assist combines Adaptive Cruise Control (including Front Assist), Adaptive Lane Assist, and Traffic Sign Recognition functions. For maximum safety, it must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behaviour is detected by the capacitive steering wheel. Travel Assist comes exclusively in combination with the Virtual Cockpit and Amundsen infotainment system.

Adaptive Lane Assist

The system is capable of keeping the car in the middle of the correct lane and of alerting the driver in case of deviation. It can also take control of the car in the event of lane changes during roadworks.

Park Assist

Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking place and safely parks in a row of parallel or perpendicularly parked vehicles.

Side Assist

Using radar sensors in the rear bumper, Side Assist which can detect other vehicles and even less detectable objects like cyclists up to 70 m away, monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

Additional experts on board

Rear Traffic Alert

This assistant, which comes as part of the Side Assist system, helps you reverse safely from a parking space during poor visibility. It can even engage the brakes automatically if it detects imminent danger.

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur en route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Manoeuvre Assist

Using the sensors of the Park Assist, this system offers protection from obstacles within driving distance of the car (at speeds of up to 8 km/h). If an obstacle is detected, based on the distance from the obstacle and the car's speed, the system engages the emergency braking.

Park Distance Control

Parking the Kamiq is easier and safer with the parking sensors integrated in the front and rear bumper, which check the car's distance from any obstacles.

Auto Light Assist

Your Light Assist will switch to high beam and back automatically, increasing comfort and safety in traffic.

Scoutline

A clean design, even when it gets dirty

If the Kamiq's elegant lines and dynamic shape unite in harmony, then the black and silver protective exterior elements of the ScoutLine version give it a bit of edge. Just like that feeling you get when you leave your comfort zone to discover something new.

Front view

While the split headlights are a nod to the Kamiq's distinctive design, the robust front bumper with add-on part in silver emphasises the ScoutLine version's off-road charisma. Bi-LED headlights including corner function and fog lights are optional.

Rear view

The add-on part on the rear bumper with integrated diffuser in silver, accentuating the generous clearance, gives the car rear an exceptionally robust appearance. The full LED tail lights including animated turn indicator come as standard.

Hard shell, comfortable core

Don't let the vigorous body confuse you, as it hides a gentle soul. Get ready to be pampered once you close the door behind you and relish the surprising roominess, state-of-the-art technologies and high-quality materials that look as good as they feel.

Upholstery & wheels

Black fabric/Suedia upholstery comes as standard.

Black leather/leatherette/Suedia upholstery with grey stitching is optional.

The 17" Braga anthracite polished alloy wheels come as standard.

The distinctive look of the car can be underlined with optional 18" Crater anthracite polished alloy wheels.

Monte Carlo

Overtakes with its design

Take the robustness and dynamic shapes of the first Škoda crossover Kamiq, mix it with the Monte Carlo style and you get an exciting car that confidently demonstrates its championship genes.

Style and functionality

The Monte Carlo version features a panoramic roof in combination with glossy black roof railings and black rear diffuser.

Black front and side

Being a true member of the Monte Carlo family, the car also comes with front grille frame, add-on part on the front bumper, door sill covers, external side-view mirror caps and alloy wheels in black.

With higher pole position

Imagine a distinguished design, comfort and smart technologies all together in one place. The Kamiq Monte Carlo features front sports seats, specific red/black upholstery and instrument panel in Monte Carlo design (optional Virtual Cockpit shown). The multifunctional sports steering wheel comes in perforated leather with black stitching. The standard equipment also includes black ceiling, pedal covers in alloy design and LED ambient lighting in red or white.

Upholstery & Wheels

The Kamiq Monte Carlo features specific red/black fabric upholstery partly in carbon look.
